Panel 3: Capital Markets and Financial Services (14.20 - 15.00)

Capital markets are maturing rapidly. This year has seen the birth of the corporate bond market and the listing of the first major bank. Next year will bring the first listing of a state-owned bank. What other developments can be expected?

The financial services sector is the largest and most important component of the capital markets in Vietnam. So far growth has been strong and share prices have performed extremely well. With state banks preparing to list in the next two years, what will happen to this industry as it meets the challenges of greater competition? What are legal and accounting updates?

Panel 4: Real Estate & Infrastructure Sectors - Building the new Vietnam (15.15 - 15.55)

The real estate sector is one of the most dynamic growth areas in the Vietnamese economy, with strong demographics and shortages in all key categories leading to many exciting investment opportunities. Developers are on a roll, and future growth depends largely on the ability of infrastructure improvements to keep pace with economic development. With the private sector increasingly becoming involved in infrastructure development and funding, where do the best opportunities lie?

Panel 5: Retail and Consumer Goods – Brand wars and the emerging consumer class (15.55 - 16.15)

The rise of the middle class has led to a revolution in the retail market as a discerning consumer class demands high quality goods at reasonable prices. Brands are emerging as the key weapon in the war to win customer loyalty. Who are the emerging leaders in this area and where will Vietnamese consumers shop in the future?

16.15 - 16.30 **Closing Remarks from VCCI**
