Fund managing director

David Blackhall

Manager

VNL is managed by VinaCapital Investment Management Ltd ("VCIM" or the "Investment Manager"), a Cayman Islands company. VCIM was established in 2008 and manages three listed and several unlisted investment companies.

More information about VCIM is [available here](#).

Manager comment

VNL's unaudited net asset value was USD498.5 million or USD1.03 per share as at 31 March 2013. This represents a 1.0 percent decline from a net asset value per share of USD1.04 at close of business on 31 December 2012. VNL's share price decreased 8.7 percent to USD0.42 as at 31 March 2013, from a closing price of USD0.46 as at 28 February 2013. During the month, VNL repurchased and cancelled 350,000 ordinary shares. Since October 2011, the Company has cancelled a total of 18.1 million ordinary shares, representing 3.62 percent of the total shares in issue prior to the commencement of the share buyback program.

Real estate market update

The proposed establishment of a state-led asset management company (VAMC) to deal with non-performing loans (NPLs) in the banking system has not been approved, given further refinements are required from related ministries and government bodies. While the government is continuing to finalise an effective solution, NPLs continue to impact commercial banks negatively and hinder their ability to lend or reduce interest rates. As a result, lending rates are still sitting at around 15.0 percent for real estate related loans, resulting in an extremely challenging environment for financing and re-financing of real estate projects. The Manager is currently working with several local banks to renegotiate existing project bank loans in addition to exploring alternative offshore debt facilities.

According to Jones Lang LaSalle and CBRE, the residential sector experienced some improvement in demand volume during the previous quarter; however, selling prices continued to either fall or remain flat at best. The majority of the apartment and landed home units purchased were lower/mid market and either completed or scheduled to be handed over during 2013.

During March, VinaLiving showcased all its projects at the BMW Test Drive event held in both Ho Chi Minh City and Hanoi, coupled with several other marketing events. Additionally, various product training workshops were organised in order to update our partner agents on project progress and new launch promotions to stimulate sales. During March, four sales were closed at our Danang and Nha Trang based projects. Regarding project divestments, the Manager is progressing on several discussions with prospective investors, while sourcing new potential buyers.

YTD		-9.4	-13.2	2.3	-11.3	14.8

Vietnam's consumer price index slowed to an annual rate of 6.6 percent during the month of March.

Q1 2013 GDP growth slowed to 4.9 percent and was mostly attributable to exports.

Primary bond activity increased 132.5 percent with a total of USD1.6 billion in government bonds issued in March.

Macroeconomic update

Vietnam's consumer price index (CPI) slowed to 6.6 percent in March, on a year-on-year basis, mainly attributable to food and foodstuff prices increasing just 1.8 percent during the period. The State Bank of Vietnam (SBV) cut main policy rates by 100bps, therefore, the refinance and discount rates have been lowered to 8.0 and 6.0 percent, respectively while caps on deposit rates were lowered to 7.0 percent. This represents a signal to investors and businesses that the central bank is continuing to support the economy by lowering lending rates in an attempt to stimulate growth.

First quarter GDP figures showed the Vietnamese economy expanded by 4.9 percent, mainly driven by exports. The foreign direct investment sector continues to be important to support growth as the government implements policies to improve domestic demand. During the month, foreign direct investment disbursement figures reached USD1.7 billion. Additionally, registered capital soared from just USD350 million in February to USD5.4 billion in March from a commitment of USD2.8 billion for the Nghi Son oil refinery and USD2.0 billion for a new Samsung factory in Thai Nguyen.

In March, the SBV also demonstrated its ability to stabilise the foreign exchange market following the disturbance caused by an increase in demand for USD to cover imports during February's lunar holiday season. The SBV intervened by selling official dollar reserves in a sufficient quantity to maintain the longstanding exchange rate of approximately VND20,900 per USD.

Fixed income

The primary bond market was highly active in March, with a total of USD1.6 billion worth of State Treasury and Vietnam Bank for Social Policy bonds issued, a 132.5 percent increase over the previous month. As a result, bond yields fell by 70-75 bps to 8.87 and 9.25 percent on 3-year and 5-year State Treasury bonds, respectively. The secondary market also saw bond yields decline due to increased demand, specifically for short-term, 1-year and 3-year bonds.
